

WHO IS Knowledge Architects. ?

Knowledge Architects transform **SILOS** into **COLLABORATIVE CONNECTIONS**.

With a team of experienced learning and development professionals, technologists, and engineering experts, KA's business philosophy is simple: **STREAMLINE PROCESSES** and **SIMPLIFY KNOWLEDGE ACQUISITION** to deliver real value for our clients' operations and organizational learning initiatives.

Our scope of services ranges from organizational change initiatives and interactive digital training solutions to cloud-based mobile applications that streamline business processes and support employee productivity and resource optimization..

Our services complement process improvement initiatives from simple department-level programs to the most complex, multi-tiered enterprise integrations.

Process Improvement

We help clients reduce organizational layers, eliminate unproductive activities and utilize technology to improve data dissemination and decision making.

- Process Design
- Policy/Procedures Manuals
- Operations Processes
- Technical Documentation

Learning & Development

Our organizational design expertise means we can comfortably and rapidly respond to your on-demand learning initiatives and the into-the-future programs.

- Change Management
- Leadership/Talent Development
- Curriculum Development
- Training and Facilitation

Mobile Technologies

We develop customized tools that facilitate information sharing, on-demand learning, and data analysis in support of operational improvement initiatives.

- Custom mobile app development
- Digital work instructions
- eLearning development (AR and 3D)
- Inspection/Maintenance management Apps
